Nuova call for proposal KBBE

Il tema 2 pubblicherà a breve una nuova call for proposal per **un solo topic**, con un budget disponibile di **3 milioni di euro** per una proposta finanziabile.

La proposta dovrà essere sottomessa entro il **17 settembre 2013**.

Di seguito la versione (bozza) del topic:

KBBE.2013.3.5-03: Two-year carcinogenicity rat feeding study with maize NK603

Call: FP7-KBBE-2013-FEEDTRIALS

The EU legal framework on GMOs ensures that genetically modified (GM) food and feed are when placed on the market safe as regards human and animal health and the environment. The European Commission has very recently adopted a Regulation concerning applications for the authorisation of GM food and feed, requesting applicants to carry out an obligatory 90-day feeding study with whole food/feed for each submitted GMO dossier. Depending on the outcome of previous studies, a two-year carcinogenicity study with rats may also be requested by the European Food Safety Authority (EFSA) on a case-by-case basis....

EVENTI

Workshop Find Eco-Innovation in air sector in ECOWEB!

Bruxelles, 04 Giugno 2013

Nel quadro dell'evento Green Week 2013, **due Workshop** saranno organizzati il **4 Giugno 2013** presso la sede **APRE a Bruxelles per parlare di eco-innovazioni legate all'aria**. L'obiettivo dei due workshop è di informare PMI, moltiplicatori e ricercatori presenti circa la nuova e interattiva piattaforma ECOWEB (<http://www.ecoweb.info>). ECOWEB, infatti, ha diverse funzioni che rendono veloce e comprensibile la ricerca di tecnologie e di applicazioni sviluppate nell'ambito dei progetti finanziati dal 6PQ, 7PQ, Life plus e CIP nel campo dell'ecoinnovation.

NEWS

Commission plans to support development of 'smarter cities'

On 14th May, the Commission hosted the first High Level meeting of the European Innovation Partnership (EIP) "Smart Cities and Communities". The EIP plans to support wide-scale deployment of innovative technologies in the areas of mobility management, energy generation, distribution and consumption, and information and communication technologies. The EIP also aims at increasing the collaboration between local decision makers, industry suppliers, and civil society representatives. The Commission intends to play the role of catalyst in promoting partnerships whereby stakeholders commit on the basis of co-operative self-organisation.

Bio Japan Cluster Mission : Matchmaking mission in Japan for EU Cluster managers and their SMEs members

Within the framework of the European Commission (DG-ENTR) new policy aimed at promoting SME internationalisation through Clusters, and the Centre's current mission to promote and support EU-Japan Cluster cooperation, the Centre will organise a cluster match-making mission in Japan. This mission aims to support cluster organisations and their SME members in their efforts to access global value chains and develop strategic worldwide partnerships and business cooperation.

The mission will give European SMEs the opportunity to enter the Japanese market and establish technology or business partnerships and therefore increase their innovation capacity and make them more competitive on the global scale. The mission shall also contribute to improve the cooperation strategies between EU and Japanese clusters.

The mission targeting the Biotechnology sector will be organised in the fringes of "BioJapan 2013" Expo in Yokohama in October 2013. Couples « Cluster & SMEs » are invited to send the applications by 30th May 2013.

EVENTS

Workshop on the applications of EU satellite navigation programmes (Galileo & EGNOS)

Bruxelles, 04 June 2013

The workshop will bring together the European Commission (EC) and stakeholders and enable them to exchange their viewpoints and experience about the European GNSS downstream applications sector.

In the light of the on-going public consultation on applications of EU satellite navigation programmes, the first part of the workshop will focus on the past and future activities of the EC aiming to maximise and ensure the market uptake of European GNSS downstream applications.

The second part of the workshop will seek stakeholders' input and will enable participants to present their experience, ideas or proposition relating to the past and future Action Plan on GNSS Applications.
